Key	Variable	Definition
	Latinname	animal Genus and species
	Common name	animal common name
	Spec_ID	unique DLC identifier
	Sex	M=male; F=female
	Name	house name
	DOB	date of birth
	Age	age, in years, as of report date
	Age Status	age status as of report date; see below for more details
	Dam_ID	unique identifier of female parent; see below for more details
	Sire_ID	unique identifier of male parent; see below for more details

FR	free-ranging information; see below
Building	building where enclosure is located
Area	area where enclosure is located
Enclosures	numbers/letters included in enclosure
FR	status general free-range status (free-ranging diurnal, free-ranging nocturnal or not free-ranging; see below under FR for details)

Details

Age Status	Age status is generated using maximum age (MaxAge) and earliest age at reproduction (MinAAR) for the species.
Infant/Juvenile	less than MinAAR
Young Adult	MinAAR to 2xMinAAR
Adult	2xMinAAR to 75% MaxAge
Old Adult	75% MaxAge to 95% MaxAge
Very Old Adult	>95% MaxAge
Dam and Sire ID	
starts with "oi_"	dam/sire is not part of the DLC collection and ID number is that of another institution
WILD	animal was wild born so dam/sire is unknown wild individual
MULT#	there were multiple possible sires (number following MULT indicates number of possibilities)
UNK	dam/sire is unknown
FR	
NHE#	diurnal animal free-ranging in a forested Natural Habitat Enclosure (the number following NHE indicates which one)
Y	nocturnal animal free-ranging in an open format room in one of the nocturnal areas (nocturnals do not free-range outside)
n	the animal is not free-ranging

Notes

Animal groups	Animals that share the same Building, Area, and Cages are in the same group and are listed together in this file.
Mixed species pairs	In a few cases, animals of different species for a pair; they will share the same Building, Area, and Cages but will not be listed together in this file as it is organized by species
Free-ranging groups	Groups from different species will often share the same free-ranging NHE but are still considered separate groups
Filtering	To filter by any variable (Latiname, for example), click on the triangle on the right side of the column heading, uncheck "select all". Then check the box(es) next to the data you want to retain. To restore the full dataset, go back to the filter and check "select all" You can filter by multiple variables, but remember to unfilter all of them to restore the full dataset.
