

# Leap Like a Lemur!

Most lemurs walk on all fours--meaning that their hands and feet are both on the ground as they walk.

(Watch ring-tailed lemurs walk in [this video!](#))

Coquerel's sifakas walk--or bounce--on two legs, the way we do!

(Watch sifaka lemurs bounce in [this video!](#))

Try walking like a ring-tailed lemur, and then like a sifaka.  
Which one is easier?

---

Sifaka lemurs can leap up to 30 feet! Have an adult help you measure 30 feet in an open space. Can you jump that far? How far did you jump?
